

Tips on How to Pack your Valuables:

- (1) Put pallets or a grid of 2'x3's on Unit floor to give better air circulation under your goods; leave a walkway or aisle to the rear of the Unit; do not overpack room!
- (2) Fill boxes to capacity; partially full or bulging boxes may collapse or tip over while stored.
- (3) Label your cartons/goods; enter location in this log.
- (4) Books and documents: Pack books flat to protect their spines; use many small boxes to avoid cartons that are too heavy to move easily; put heavier items on bottom.
- (5) Dishes and Glassware: Glass items should be individually wrapped; use blank newsprint wrapping paper for the best results; "nest" cups and bowls, stand plates and platters; fill air pockets with newsprint wrapping paper or foam peanuts; don't put breakables under other boxes.
- (6) Mirrors, Windows, Screens: Wrap all glass well; store on edge, not flat.
- (7) Lamps: Pack delicate lamp shades separately; use blank newsprint wrapping paper to wrap lamp shades / other property that may be damaged by ink-stains from regular newsprint.
- (8) Furniture: Stand sofas and mattresses on end; disassemble beds / tables; wrap legs in newsprint wrapping paper; keep upholstery off floor; place loose, light plastic dust covers over furniture.
- (9) Appliances and electronics: Clean appliances thoroughly; refrigerators and freezers must be defrosted and dry and washing machines completely drained; remove doors of appliances and store separately; desiccants (drying agents) should be used and containers checked and emptied regularly.
